Gary:

Thanks for taking the time to discuss. The firm that we would like to use for the completion of the RI/FS is SEMS, Inc. (<http://semsinc.net/>) of Baton Rouge, Louisiana. I have spoken to them about this project, and they have conferred with TRC about some of the work being conducted on the site before we acquired it from NORCO.

SEMS has experience working on numerous Super Fund sites and has worked with the (EPA- Region 6) Office before. Please review their web site and the attached Statement of Qualifications and pass it on as you see appropriate.

Regards,

Jonathan
